

Intermediate & Senior Physics Challenge (IPC/SPC Online)

Registration not yet open

The Intermediate & Senior Physics Challenge (IPC/SPC) is organized by the ASEEDER (Seed International). These are the online challenges and are a great opportunity for students who wish to take part in the Physics competition, test their knowledge and understanding of their basic Physics principles, engage in problem-solving questions, and develop their skills and confidence in their subjects.

The problems on the Senior Physics Challenge include short answer questions that provide an excellent tool to assess and challenge student's ability to work on solving questions and developing those skills. The Intermediate Physics Challenge includes a traditional problem-based set of questions that aim to test students' knowledge and understanding of basic physics principles. To recognize the highest performers in the challenge, the top-scoring participants will be awarded Bronze, Silver, and Gold awards.

Further details to be provided when available.
