

UKBC - Biology Challenge (BC)

Registration not yet open

The United Kingdom Biology Competitions - Biology Challenge (UKBC-BC) is organized by the ASEEDER (Seed International) and aims to encourage students to explore biology and develop their knowledge and skills in the subject.

The UKBC-BC consists of TWO papers of multiple-choice questions. Students will need to complete both papers to be considered for an award category. Both papers are entirely online and the competition will reward those students whose knowledge of the subject has been increased by reading books and magazines, watching natural history programmes, taking notice of the news media for items of biological interest, and are generally aware of our natural flora and fauna.

This is a good opportunity for the students to gain exposure to the rigor of the science competition in the United Kingdom and pit their skills against other participants around the world.

Further details to be provided when available.
