Family Program

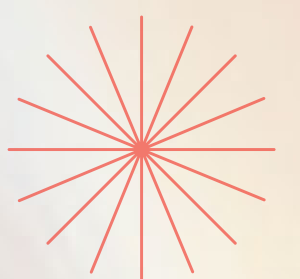

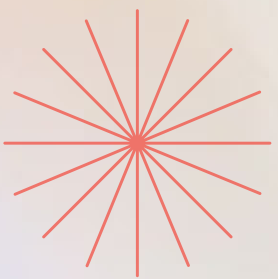

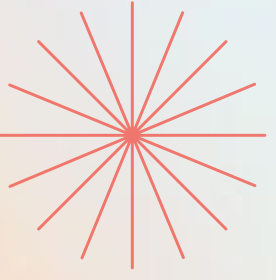

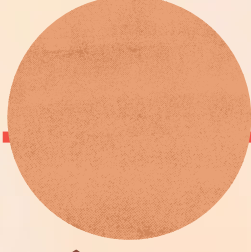

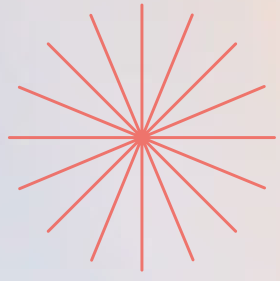

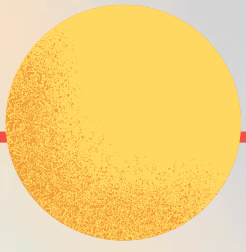

by Gorn (Secondary 3)

Cooking outdoors is a very challenging thing to do without electricity or gas. Our task was to cook food using a charcoal stove. At first, it was hard to get the charcoal to light. But once we had a flame, the cooking began. We had a lot of fun and learned a lot about cooking outdoors which some of us had no previous experience with. The task helped students to practice teamwork and to develop their thinking skills. The food didn't taste too bad either.

PRIMARY 1-4 HOUSE BONDING

by Daniel P2 Creativity

Wednesday 14 September, right after the Nation Anthem and School Song, the primary 1 – 4 students assembled in the gym for House bonding activities. We lined up in our House groups and eagerly awaited the activities to start. The game we were playing was to throw plastic balls over the volleyball net to the other side where the opponent's team was doing the same thing. The idea was to throw as many balls into the opponent's caught as possible so, at the end of the game, they would have more balls in their caught than we did. Less is better in this case! It was a really fast and energetic game. There were a number of rounds where everyone had the chance to compete against the other House teams. In the end, the Red House was the winning team. Well done everyone for playing and having lots of fun.
